SPECTRUM
FAN CARD

ABOUT FAN CARD

With the speed at which computer components now run, there is a tremendous amount of heat generated inside a PC. While case fans help cool the system, they generally only provide horizontal airflow. With that in mind, Vantec introduces the Spectrum Fan Card. Utilizing any available PCI slot, the Spectrum Fan Card serves a dual purpose of directly cooling any PCI/AGP cards surrounding it as well as providing better air circulation with two adjustable fans. Made from UV sensitive material and featuring built-in UV LED lights, the Vantec Spectrum Fan Card lights up your case while cooling it down.

FEATURES

▶ **Adjustable Fan Speeds**
▶ **Perfect for Windowed Cases**
▶ **Built-in Ultra Bright UV LED Lights**
▶ **Increase Air Circulation, Lower Case Temperature**

SPECIFICATIONS

▶ Outline Dimension: 195x92x20mm
▶ Fan size: 70x70x15mm
▶ Voltage: 7 ~ 12V
▶ Power: 9W
▶ Speed: 2400 ~ 4000 RPM
▶ Airflow: 17.73 ~ 29.54 CFM
▶ Current: 0.327A ~ 0.750A
▶ Noise: 25 ~ 36.64 dBA
▶ Bearing Type: Ball Bearing
▶ Life: 50,000 hrs
▶ Weight: 300g
